

# POWAFix<sup>®</sup>

## Powerful Quick Fixing Systems<sup>™</sup>

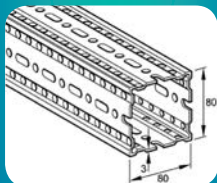

Connection of beams at same level

Fine adjustment  
No reworking

Meccano Style System

One fastener for the whole system

### Why use SupaFramo?

- ✓ Multidirectional flexibility
- ✓ Minimised assembly time
- ✓ Approved safety

SupaFramo is a multi-functional support system for the modular construction of framing solutions. SupaFramo allows multi-directional connection possibilities. The box section profile has a high torsional resistance and stepless adjustment capability for connecting members. The innovative connection technology guarantees maximum installation efficiency.

You can create a structure or sturdy engineered frame without welding or any hotworks and even without fiddly nuts, washers.

With SupaFramo a customised steel fabrication that you create can be recycled or reused.

### NO NEED FOR:

- 1 Any welding, hot-works or a hot-works facility
- 2 Qualified tradesman or specifically trained staff
- 3 External engineers for structural design and engineering
- 4 Special tools or equipment
- 5 Paint shop or sending structure off to the galvaniser
- 6 Crane or special transport for placing pre-finished structures

### SupaFramo is the ANSWER

- Non-welded secondary steelwork frame system
- Thread forming shake proof, antivibration fastening
- High torsion resistance
- Weight saving benefits (only 6.4kg per m)
- 3D carcass construction
- Easily adjustable connection components

## SupaFramo Applications

Secondary Steel

Goal Post Frames Internal/External

Electrical Services

Walkways

Mechanical & Pipe Support

Plant Accessory Versatility

Modular

Water Works
