

Technical Data Sheet | Macrofix Clips

Features

- Unique rubber design to prevent rolling and binding which allows pipes to slide on installation
- EPDM rubber (ethylene propylene diene monomer rubber), isolation rubber for sound reduction, compliant with DIN4109
- High strength engineered Steel Profile design
- M8-M10 Combination Nut for connection
- Plastic shake proof washer prevents bolts falling out on installation
- Self-locating Phillips drive metal threads
- Finish: 8-12micron Electro-zinc plating

Applications

Recommended for the suspension and support of stationary pipelines where noise reduction is required in both vertical and horizontal applications

- To suit all pipes from 12 mm to 168 mm including PVC, HDPE, Copper, Steel and Pex
- Temperature rating from -40°C up to +120°C
- Heavy duty (HD) pipe clamps for pipes carrying heavy loads
