

KLIP-LOK ROOF BRACKET

The Klip-Loc Roof Bracket is suitable for installation in a variety of flatroofs including small systems for home use, large commercial and power station systems.

PRODUCT DETAILS:

- Made of Aluminium
- Adjustable to all Klip-Lok Roof types
- No Roof Penetration
- 12 x M8 Threaded Holes (bolts included) to tighten clamp
- 2 x M8 Threaded Holes (Bolts included) on topside to mount products such as strut & cable tray
- Additional 3 x M8 Holes on topside for extra support if required
- Heat & Weather resistant rubber attached to clamp to prevent corrosion
- Anti-Vibration

The greatest advantage of this mounting system is that its 90 degree angle means the mounting structure is easy to install, which saves the installation time and labor.
